STUMP BUCKET

SKID STEER ATTACHMENT

SHOW YOUR STRENGTH...

The Stump Bucket is designed for maximum prying strength for the toughest stump and rock removal jobs. A specially engineered fulcrum point provides additional leverage for digging. The reinforced mounting plate is built to handle the added pressure. Serrated sides provide cutting action to work through stubborn roots.

FEATURES

- Heavy-Duty 1" by 6" cutting edge
- 1/2" steel on sides, bottom, and back of the bucket
- Fulcrum point for prying out stumps and rocks with added leverage
- Reinforced mounting plate to handle large prying loads
- Solid welds inside and out for increased strength
- Our universal quick attach plates fit most skid steers
